## LECTURE TOPICS AND FEES FOR 2022 SEASON

### #1 The Art of Growing Food

As co-founder of The Cook's Garden Seed catalog, you will learn my six steps to successful kitchen garden design based on my years as an artist, a gardener, and as a cook who loves to grow a food garden.

A true kitchen garden opens your senses in new ways and is more than a place to grow food. In this lecture, you will discover how to grow an edible garden with an eye towards beauty, productivity, and sanctuary. Based on designs from The Complete Kitchen Garden, this lecture is designed to expand your knowledge of the classic design elements that are the basis for European potagers. ❖

### #2 New Heirloom Garden

In this lecture, you will learn my six steps to successful kitchen garden design, combined with what to grow for old-fashioned flavor, fragrance, and forgotten charm in your garden.

Be prepared for the delicious revolution and discover forgotten fruits, fragrant flowers, and heirloom vegetables. This lecture is based on my newest book, The New Heirloom Garden, with a focus on digging deeper into the diverse world of plants and why heirlooms truly matter: for flavor, fragrance, and diversity. Be inspired to be a seed saver, for yourself and your friends. ❖
